

# FAQ: College Entrance Exams

## GENERAL

**What are college entrance exams?** These tests are designed to measure students' skills and help colleges evaluate how ready you are for college-level work. The SAT® and ACT are both accepted by nearly all colleges and universities.

**Do all colleges require a college entrance exam as part of the application process?** Most four-year institutions require a college entrance exam score. The ones that do not require these scores will indicate that in their admission policies.

**What other tests may be recommended or required?** Some colleges may require SAT Subject Tests™ as part of the admission application, for application to certain majors, or for course placement.

**How many times should a college entrance exam be taken?** Most students take a college entrance exam twice—once in the spring of the junior year and once at the beginning of the senior year.

## SCORES

**How do colleges use test scores?** They are used to apply a common standard for all students no matter where they went to high school. Colleges look at your test scores, along with your high school grades and courses, to see how well prepared you are for college-level work.

**Does a college receive all scores from every college entrance exam you've taken?** Some colleges will allow you to select which scores you would like considered for admission and others might have specific instructions about which scores get reported. This information, along with how they require them to be sent, will be included in their application guidelines.

## PREPARING

**What is the best way to prepare for a college entrance exam?** The best way to prepare is to work hard both inside and outside the classroom. Take challenging courses, study hard, and read and write as much as you can.
